

Workplace challenges? Digital administration offers key benefits!

Extraordinary times call for extraordinary solutions. The Digital Assessment Library, a solution that offers school districts unlimited use of over 40 assessments on **Q-interactive®** and **Q-global®**, provides many key benefits schools are looking for right now. Three of these include easy cleaning of devices, social distancing for assessments, and remote administration.

Easy cleaning

- Hardware devices can be easily sanitized
- Fewer items to clean after sessions

Social distancing for face-to-face assessments

- Q-global® digital stimulus books can be shared on a second monitor placed a safe distance away from the examiner and used for test administration
- iPad® devices using Q-interactive® can easily connect at a safe social distance and through personal protective accommodations like plexiglass barriers

Remote administration

- Many Q-global tests can be administered via remote administration using the examinee's own device
- Digital stimulus books found on Q-global can be used during a telepractice assessment
- Q-interactive can be used, with some accommodations, during a telepractice assessment
