

*“Reading is important,
because if you can read,
you can learn anything
about everything
and everything
about anything.”*

— Tomie dePaola

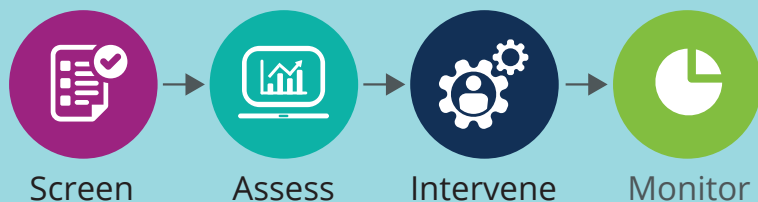

Reading opens up a world of possibilities.

EDL2+ helps you give them the keys!

While reading is arguably the most important skill needed in order to achieve any level of academic success, its value doesn't end outside of the schoolhouse doors. Reading expands our minds in many ways, including increasing our vocabulary, improving our concentration, and enhancing our analytical thinking skills. It allows us to “travel” to places we might otherwise never experience, and “travel” in time to meet the people who live only in memories and books.

EDL2+ supports your model for assessment and intervention

Our reading tools are organized around key functions of your work: screening, assessment, intervention/instruction, and progress monitoring. These distinct functions, crafted into an efficient process and expertly delivered, provide teachers and students with the best possible outcomes.

Developed by teachers. Developed for you!

The Evaluación del Desarrollo de la Lectura[®], Second Edition (EDL[™]2+) combines decades of teacher acumen with Pearson's test development strength to provide the premier assessment of good reading behaviors. It includes everything you need to assess, intervene, and monitor your students' reading progress, AND the guidance you need through each step — all in one complete package. With engaging fiction and nonfiction stories and a new digital platform, the EDL2+ meets the high standards of quality and rigor you depend on for your students.

The assessment approach used in EDL2+ is based on reading research and feedback from experienced educators who have identified the key behaviors of good readers. The specific tasks and prompts used at different levels of an EDL2+ assessment are developmentally appropriate for each student's current stage of learning.

Observe, document, inform — all in one tool!

EDL2+ provides the tools you need to observe and document student reading abilities while informing instruction.

Benchmark Assessment helps to determine each student's independent or instructional reading level with an evaluation of three components: reading engagement, oral reading fluency, and comprehension.

Once the assessment is complete, the results will help guide teachers in determining the instructional needs for each student using the EDL2 Focus for Instruction.

Word Analysis will allow you to obtain more in-depth information for an individual student. It provides a systematic means to observe how struggling and emerging readers attend to and work with various components of spoken and written words.

Progress Monitoring provides brief, leveled reading passages that can be used to evaluate and track the growth of at-risk readers in between benchmark assessments. The information it provides allows you to adjust each student's personalized plan.

Administration, scoring, and reporting

Whether you're comfortable using paper-and-pencil to record your student's reading assessment, or the new comprehensive digital platform, EDL2+ provides all the tools and resources you need for administration, scoring, and reporting.

New! Online EDL2+ platform

EDL2+ has added an online platform for digital administration, scoring, and reporting. Use the new platform to capture, store, and report at the student, class, school, district, or state level. Device agnostic (laptop, desktop, or tablet), the web-based platform provides several advantages including access to additional reporting options and digital versions of the teacher resources from the EDL2+ print kit.

EDL2+ Kit (Print) with Subscription (Digital)

A103000066980

- Benchmark Assessment Books (Levels A–60)
- Benchmark Assessment Teacher Guide
- Word Analysis Teacher Guide
- Progress Monitoring Assessment Teacher Guide
- Benchmark Assessment Blackline Masters
- Word Analysis Student Assessment Book
- Routine Cards
- Directions Card
- Student Assessment Folders
- Hanging file folders
- Training DVD
