

Minnesota Multiphasic
Personality Inventory-Adolescent
Restructured Form™

*Robert P. Archer, Richard W. Handel, Yossef S. Ben-Porath,
and Auke Tellegen*

The newest standard in adolescent personality assessment

The MMPI-A-RF® is the most up-to-date adolescent version of the MMPI. The test is linked to current models of psychopathology and personality and features several adolescent-specific scales to support diagnosis and treatment planning in various settings.

Clinical, school, and counseling psychologists can use the MMPI-A-RF to help:

- Identify potential problems and possible root causes early
- Assess major manifestations of psychological dysfunction
- Make decisions for appropriate referrals
- Share information with parents, teachers, and others in the adolescent's support network

“With outstanding psychometric properties, theoretically driven hierarchical organization, and clinically relevant scales, the MMPI-A-RF™ is now the most comprehensive measure available for assessing and understanding adolescent emotional, interpersonal, and behavioral functioning and personality characteristics.”

— Hope Goldberg, PhD, ABPP-CN
Private Practitioner, Adult and Adolescent Clinical Neuropsychology
Pasadena, CA

Overview
