

Computer Specifications and Software Components

To use the CBT MAT software, computers must meet the following specifications

- **Note:** If your CTC uses a **Desktop Management Software**, such as Deep Freeze™, which restores an image after you restart the computer, you will need to contact your internal Technical Support for help in allowing write access to the MAT folder and its contents

Minimum System Requirements

- ☞ Windows 2000/XP/NT 4.0/VISTA
- ☞ Microsoft Internet Explorer 6.0
- ☞ Pentium II 400 MHz processor
- ☞ 128 MB RAM
- ☞ Display capable of 800x600 resolution with 256 colors
- ☞ Internet connection
- ☞ 280 MB free hard disk space required (40MB additional required for installation)
- ☞ Mouse or compatible pointing device

Recommended System Requirements

- ☞ Windows /2000/XP/Vista
- ☞ Microsoft Internet Explorer 6.0, 7.0
- ☞ 1GHz processor
- ☞ 512 MB RAM or above (more memory improves performance)

- **Note:** It is strongly recommended that your CTC use an uninterruptible power supply, which will allow examinees to continue taking the MAT in the event of a power outage.
