## GSV Chart

Seq	Date Range	Number of Tests	GSV Mean	GSV SD	Standard Score Mean	Standard Score SD
1	9/6/2005–12/18/2005	104	152	11	102	14
2	3/15/2006–5/22/2006	90	154	12	101	15
3	9/11/2006–12/15/2006	86	159	10	102	15
4	3/7/2007–5/20/2007	81	160	9	100	13

The Growth Scale Value (GSV) is a score that tracks vocabulary over time. Much like inches are an equal-interval scale of length, the GSV is an equal-interval scale of vocabulary. Therefore, the GSV can be used as a yardstick by which progress can be measured throughout the school years.

The EVT-2 measure can be used reliably in a test-retest situation. If the timeframe is short (e.g., 6 weeks or less), it is suggested that the examiner use the alternate form for the two test sessions (e.g., EVT-2 Form A for the first testing and EVT-2 Form B for the second testing). If the time between the first and second testing is longer (so that practice effects are not as great), then the retest can be administered with the same form.
