ASSIST™ Software Frequently Asked Questions General

I am having problems installing the correct fonts.

Please begin by trying solution #1. If it does not work, then try solution #2.

Windows® Users:

Solution #1:

- Click START
- Click SETTINGS
- Click CONTROL PANEL
- Double click FONTS folder
- Click FILE
- Click INSTALL NEW FONT
- In the first window double click C:\
- Double click AGSRUN folder
- Click SELECT ALL
- Click OK
- The fonts are installed

Solution #2:

- Download [Fonts.ZIP](#)
- This download is in a ZIP format. Click [WINZIP®](#) if you don't already have it installed.
- Download the Fonts.ZIP file from above onto your Desktop
- Unzip the files using Winzip®
- When extracting extract the files into your C:\Windows\Fonts directory
- This will resolve your font issue

Macintosh® Users:

Solution #1:

- Double click Macintosh® Hard Drive
- Double click the ASSIST folder to open it
- Go back to the Hard Drive and double click the System Folder
- Double click the FONTS folder
- With both the FONTS folder and the ASSIST folder open, hold the SHIFT key and click on Foxfont and Foxprint in the ASSIST folder
- Once highlighted, drag the fonts into the FONTS folder
- Close all windows
- This will resolve your font issue

Solution #2:

- Download [FoxFont.sit](#)
- Download the foxfont.sit file from above onto your Desktop
- Decompress the file using Stuffit Expander. The expander will create a folder on your Hard Drive labeled Foxfonts Folder.
- Open up the folder and drag the foxfont and foxprint font suitcases into the Fonts folder located on your Hard Drive in the System Folder
- This will resolve your font issue
