Note. All classifications of test scores are subject to the application of the standard error of measurement (SEM) when making classification decisions. Individual clinicians are advised to consider all case-related information to determine if a particular classification is appropriate. See the BASC-2 Manual for additional information on SEMs and confidence intervals.

## Scale Summary

This report is based on MR SAMPLE's rating of TIMMY's behavior using the BASC-2 Parent Rating Scales form. The narrative and scale classifications in this report are based on T scores obtained using norms. Scale scores in the Clinically Significant range suggest a high level of maladjustment. Scores in the At-Risk range may identify a significant problem that may not be severe enough to require formal treatment or may identify the potential of developing a problem that needs careful monitoring.

### Externalizing Problems

---

The Externalizing Problems composite-scale T score is 65, with a 90 percent confidence-interval range of 61-69 and a percentile rank of 92. TIMMY's T score on this composite scale falls in the At-Risk classification range.

TIMMY's T score on Hyperactivity is 72 and has a percentile rank of 96. This T score falls in the Clinically Significant classification range, and usually warrants follow-up. TIMMY's father reports that TIMMY engages in many disruptive, impulsive, and uncontrolled behaviors.

TIMMY's T score on Aggression is 51 and has a percentile rank of 62. TIMMY's father reports that TIMMY tends not to act aggressively any more often than others of his age.

TIMMY's T score on Conduct Problems is 67 and has a percentile rank of 94. This T score falls in the At-Risk classification range, and follow-up may be necessary. TIMMY's father reports that TIMMY sometimes engages in rule-breaking behavior, such as cheating, deception, and/or stealing.

### Internalizing Problems

---

The Internalizing Problems composite-scale T score is 56, with a 90 percent confidence-interval range of 51-61 and a percentile rank of 75.

TIMMY's T score on Anxiety is 52 and has a percentile rank of 61. TIMMY's father reports that TIMMY displays anxiety-based behaviors no more often than others his age.

TIMMY's T score on Depression is 59 and has a percentile rank of 84. TIMMY's father reports that TIMMY displays depressive behaviors no more often than others his age.

TIMMY's T score on Somatization is 53 and has a percentile rank of 66. TIMMY's father reports that TIMMY complains of health-related problems to about the same degree as others his age.

### Behavioral Symptoms Index

---

The Behavioral Symptoms Index (BSI) composite-scale T score is 64, with a 90 percent confidence-interval range of 60-68 and a percentile rank of 91. TIMMY's T score on this composite scale falls in the At-Risk classification range. Scale summary information for Hyperactivity, Aggression, Depression, and Attention Problems (scales included in the BSI) has been provided above. Scale summary information for the remaining BSI scales is given next.

TIMMY's T score on Atypicality is 60 and has a percentile rank of 86. This T score falls in the At-Risk classification range, and follow-up may be necessary. TIMMY's father reports that TIMMY sometimes engages in behaviors that are considered strange or odd, and he at times seems disconnected from his surroundings.

TIMMY's T score on Withdrawal is 58 and has a percentile rank of 81. TIMMY's father reports that TIMMY

## Scale Summary

does not avoid social situations and appears to be capable of developing and maintaining friendships with others.

### **Adaptive Skills**

---

The Adaptive Skills composite-scale T score is 49, with a 90 percent confidence-interval range of 45-53 and a percentile rank of 43.

TIMMY's T score on Adaptability is 46 and has a percentile rank of 33. TIMMY's father reports that TIMMY is able to adapt as well as most others his age to a variety of situations.

TIMMY's T score on Social Skills is 44 and has a percentile rank of 28. TIMMY's father reports that TIMMY possesses sufficient social skills and generally does not experience debilitating or abnormal social difficulties.

TIMMY's T score on Leadership is 49 and has a percentile rank of 44. TIMMY's father reports that TIMMY, when compared to others his age, demonstrates a typical level of creativity, ability to work under pressure, and/or an ability to bring others together to complete a work assignment.

TIMMY's T score on Activities of Daily Living is 55 and has a percentile rank of 65. TIMMY's father reports that TIMMY is able to adequately perform simple daily tasks, in a safe and efficient manner.

TIMMY's T score on Functional Communication is 50 and has a percentile rank of 46. TIMMY's father reports that TIMMY generally exhibits adequate expressive and receptive communication skills, and that TIMMY is usually able to seek out and find new information when needed.

### Content Scales

The information provided below is based on content scales that have been theoretically and empirically developed. This information is considered to be secondary to the clinical, adaptive, and composite scale information provided previously. An elevated content scale score may warrant additional follow-up.
