

# aimswebPlus: The whole child lens — at your fingertips

**Everything you need to find  
everything *they* need**

These days, time is a commodity that feels almost tangible. In order to learn where your students are regarding their literacy, mental wellness, academics, and social-emotional skills, having everything you need to achieve a “whole child view” right at your fingertips is not just convenient — it’s a necessity!

Make data-driven decisions that ensure equity and inclusion for your diverse learners by addressing the whole child through the lens of your tiered systems of support for academics, behavior, and social-emotional learning. Adding these optional measures to your aimsweb®Plus subscription will not only support the goals of your school/district, but it will also help you support the students whose unique strengths and needs are waiting to be discovered.

# Optional measures ready to help you meet the critical academic, behavioral, and social-emotional needs of your students

## Literacy

Work with students with literacy challenges? Gather the team and put the students at the center of the work!

In literacy work—reading, writing, and spelling—collaboration is key. Utilizing a universal screening process within your district actually saves you time in the long run. Collaborating across disciplines and integrating the data is truly a team effort, but one with big rewards!

- **Shaywitz DyslexiaScreen™**: Identify students at risk for dyslexia and comply with screening mandates (now includes the **Dyslexia Probability Calculator™**).
- **Rapid Automated Naming**: Quickly measure rapid automatic naming for students in K–3.
- **WriteToLearn™**: Further develop reading comprehension, expand vocabulary, build writing skills, and save time with automatic scoring!

## Behavior and social-emotional learning

Because of the scope and variety of challenges students face, using a step-by-step approach can help support them on their journey forward.

- **BASC™-3 BESS**: Determine behavioral and emotional strengths and weaknesses of all students.
- **SSIS™ SEL: Integration with aimswebPlus coming August 2021** Provide screening, diagnostic assessment, and intervention with this comprehensive, evidence-based, **CASEL aligned** social-emotional learning system.
