

Ensure all stakeholders are ready to “dive in” with aimswebPlus

Choose from our series of expert-facilitated workshops to ensure improved student outcomes.

Training and professional development is not only a vital part of learning how to properly administer, score, and interpret the assessments you depend on, it's also an integral part of your professional growth. Obtaining that professional development directly from the source is the best way to ensure you're using each aimswebPlus™ measure with fidelity. We understand that professional development is not a one-size-fits-all decision, so we've put together several in-person, live webinar, and on-demand options.

We encourage school districts to *“begin with the end in mind”* by planning their whole year of aimswebPlus professional development together. Our experts recommend three to four touchpoints in the first year of implementation and one to three in subsequent years to support attrition. Our learning facilitators are not only product experts, but they also partner with schools to ensure effective systems-level implementation.

Professional Development

Here's what your team can expect to learn from these sessions.

All sessions are three hours and available as live webinar or in-person (at an additional cost).*

aimswebPlus Benchmarking Essentials

- Understand how aimswebPlus benchmarking informs your MTSS process
- Locate key aimswebPlus platform components through guided and independent navigation
- Generalize learning through practice in collecting benchmark data using various methods

aimswebPlus Progress Monitoring Essentials

- Understand how aimswebPlus progress monitoring fits within an MTSS
- Understand and access survey level assessments to determine student baseline performance
- Use baseline and survey level assessment data to establish progress monitoring schedules
- Plan for a data collection process that can be implemented with fidelity and results in meaningful student progress data

aimswebPlus Progress Monitoring Data Utilization

- Understand how to interpret student progress graphs and determine whether a student has made sufficient progress
- Consider variables that may impact student progress and adjust student plans and measures accordingly
- Evaluate the correlation between intervention and assessment as it relates to skill deficits

aimswebPlus Benchmarking Data Utilization

- Define the key principles of data analysis and apply understanding to existing data
- Distinguish between group reports to best analyze performance and predict future outcomes
- Practice using benchmark data for program evaluation and instructional development

aimswebPlus Account Management

- Understand how aimswebPlus informs your MTSS process
- Locate key aimswebPlus management components through guided and independent navigation
- Generalize learning through practice in completing management tasks in the platform

aimswebPlus Coaching and Consultation

School teams and/or school/district leaders have the opportunity to receive direct coaching from expert aimswebPlus team members. These sessions encourage learners to come “where they are” and receive tailored implementation support that best meets the needs of each unique school (system).

Coaching & Consultation is 1 hour

aimswebPlus professional development takes you through the entire year!

All sessions (*aside from Coaching and Consultation*) are [available to purchase](#) for groups and individuals. If you have questions about which offering is right for you, please reach out to your [assessment consultant](#) who will be happy to guide your next steps.
