Empower your
online tutoring
team with
Smarthinking
infrastructure

As you plan for the upcoming school year, it's more crucial than ever to have flexible options that help your tutoring team support student success. The Smarthinking infrastructure provides a systemic approach to meeting all of your tutoring needs, providing flexibility during the transition and securely engaging students while demonstrating your district's commitment to improving outcomes for all learners.

Your tutoring team, our platform

The world-class infrastructure provided by Smarthinking can help you quickly implement or expand remote online tutoring with your own in-house tutors. Our FERPA-compliant, cloud-based conferencing platform reflects decades of experience and best practices for managing online tutoring in all disciplines, at any scale. Quickly and seamlessly integrate tutoring online, efficiently schedule and manage sessions, and keep each student learning in the face of personal and academic obstacles. Complement your district's staffed hours with Smarthinking tutors to provide around-the-clock tutoring support for your students.

Smarthinking tools can help connect your students with tutors in new ways, provide fast, flexible support for students, assess your tutoring systematically, and help student and professional tutors become more effective. This creative option allows you to provide academic assistance backed by 24/7 technical support — no matter where you and your students are located.

Build an online tutoring center

- 24/7 access to comprehensive reporting, with actionable usage and student satisfaction data for identifying trends and improving outcomes
- Full support for integration with your LMS or other systems and single sign-on student access
- Optional add-on consulting on best practices for using online tutoring services

Support tutoring coordinators as they move online

- Powerful tools for viewing, creating, and managing tutoring schedules and sessions by session, tutor, or student
- Real-time queue monitoring and reporting
- Training tools to guide new and existing tutors toward greater confidence and effectiveness

Provide flexibility and security to students and tutors

- Full support for live whiteboard tutoring, prescheduled sessions, offline tutoring, and writing review queues, for synchronous or asynchronous sessions
- Integrated text (SMS) and email messaging to keep students engaged in their learning
- Archives of all tutoring sessions, so tutors can improve and students can revisit what they learned

Smarthinking gives learners on-demand, anytime, anywhere access to academic help from experts at their moment of need.
