Pricing and Next Steps........................................................ p. 11
Social Distancing Tools & Remote Administration.............. p. 12
What is the Digital Assessment Library for Schools (DALS)?

It’s pretty simple. The Digital Assessment Library for Schools is an annual site license that provides the entire district access to a library of nearly 40 assessments used by school psychologists, speech language pathologists, education diagnosticians, special education teachers, occupational therapists, physical therapists and more. For a fixed, annual price based on the district’s total reported number of Individualized Education Programs* (IEPs), your district will have a license to use Pearson’s Digital Assessment Library and our systems for administration, scoring, reporting, and data storage for any individualized evaluations within your school district...IEP in place or not.

What does “unlimited” get your district?

Unlimited use allows your district to answer all of your referral questions, with whatever tests you need, as many times as you need to, using as many examiners as you need to do it — all for the same simple price.

Your district will have access to:

• An ever-growing digital library of nearly 40 of our most popular assessments
• Unlimited access and use of Q-interactive®
• Unlimited access and use of Q-global®
• Training for Q-interactive and Q-global
• Support personalized to your needs in your district

* Reported annually by the district to the state or Office of Special Education and Rehabilitative Services (OSERS).

This all sounds great “on paper”, but what are the real-world benefits?

Time is perhaps the most precious commodity these days, and we completely understand that making any big changes to how your district does things needs to be justified by some major benefits for everyone involved. The Digital Assessment Library for Schools came to be for this very reason. We listened to your pain points and found a way to solve as many of them as we could.

**Students in DALS districts are enjoying the benefits of:**
- Higher engagement during evaluations
- Reduced errors in scoring
- More accurate evaluations, appropriate interventions, and *improved outcomes*

**Examiners in DALS districts are enjoying the benefits of:**
- Measurable time savings
- 24-hour access to the materials they need
- Greater test flexibility
- Less back pain carting testing materials from place to place
- More space in their car

**Administrators in DALS districts are enjoying the benefits of:**
- Greater staff productivity
- Less waste and improved inventory management (no more hoarding!)
- Predictable costs and more level spending from year-to-year with no fear of running out of materials in the Spring or money to buy them

**Everyone in DALS districts is enjoying the benefits of:**
- The ability to administer tests remotely or while socially distanced during face-to-face evaluations
Which assessments are included?

The way we see it, it’s not really a value if there’s nothing your district would actually use. That’s why we packed our Digital Assessment Library shelves with the tests that the people in your district use every single day!

*May require paper record form (not included)

** Includes BASC rating scales, SDH, SOS, PRQ, and Flex Monitor

***More usages cannot be requested once they have been consumed for the school year.
What are they, and how will they make our lives easier?

We've given you a lot of information so far, but it all comes down to the technology behind the library — Q-interactive and Q-global. While both are helpful, innovative, and revolutionary, they each serve their own purpose. Let’s dig in...

What is Q-interactive and what makes it so great?

Q-interactive is an intuitive, portable system that uses two iPad® devices connected through technology within the hardware to administer “interactive” assessments such as WISC–V, CELF-5, and KTEA-3 in a 1:1 environment, which can be done while social distancing. This means that no internet connection is required for the administration of assessments.

Because almost everything you need to administer the included tests is stored on the two iPads, the dizzying array of kits and booklets that once took up space in offices, vehicle trunks, and storage rooms is now a thing of the past.

One of the greatest benefits that we’ve heard from our subscribers is that their assessments are now more targeted than ever. The immediate feedback that Q-interactive provides once a subtest is complete helps deliver a faster and accurate read on where the student is and how they are progressing at any given time. Q-interactive also allows them to adjust an individual battery in real time — as the student is taking it!

Easily cleaned and sanitized after every student!

Instead of having to sanitize individual pages of multiple stimulus books in between each student using them, you’re only sanitizing the iPad. Not only does that save immeasurable time, but the iPads can be used while socially distanced which further ensures the safety of both your students and your staff!
What is Q-global and what makes it so great?

Q-global is a web-based platform for scoring and reporting as well as the administration of many assessments that are often self-administered and un-proctored, like a questionnaire or rating scale. These measures include assessments like the BASC-3, BYI-2, Vineland-3, and the Brown Executive Functioning/Attention Scales.

A link can be utilized to send to teachers or parents asking them to complete these tests, without having to personally put them in the mail or send them home with the student.

In addition, this platform houses the Resource Library for many digital manuals and stimulus books that can be utilized to administer the test in a one-on-one setting or via telepractice.

Q-global allows your district to:

- Generate scores and reports on any internet-connected device, even for assessments that are administered using paper forms
- Email a secure link to teachers, parents, or caregivers for convenient completion of assessments on their own device
- Print select rating scales when digital administration is not an option

For additional information regarding telepractice, please visit our website for guidance documents AND consult with your professional organizations such as NASP and ASHA.

How does your district learn to use these digital systems?

With Q-interactive and Q-global, we offer extensive training to ensure your staff has the tools they need to support their students.

- Team support
- Webinars
- Video tutorials
- Resource library
- Help directory
- On-site training*

*May incur additional costs.
Ensuring that your district is getting the most out of its Digital Assessment Library is important to us. The library houses assessments used in almost every area of eligibility, so we have created some visuals to help you align assessment options for specific evaluations. To learn more detailed information about many of these assessments, or seek out additional product training opportunities, please visit PearsonAssessments.com or reach out to your Pearson representative.

### DEVELOPMENTAL DELAY
- N/A

**But wait — there’s DALS+!**

Get all the benefits of the Digital Assessment Library for Schools... PLUS! DALS subscribers can expand their benefits to include easy, unlimited access to many of the paper and pencil assessments for which digital administration is not an option.

**Add Digital Assessment Library for Schools PLUS (DALS+) and get:**
- Unlimited use of protocols and response booklets for **18 non-digital tests**
- Access to all available digital manuals and stimulus books through the Q-global Resource Library
- FREE shipping and handling for covered print materials
- 65% off on any kit purchases for all DALS and DALS+ tests

[PearsonAssessments.com/digitalforschools](http://PearsonAssessments.com/digitalforschools)
And what is this going to cost your district?

The best part about the Digital Assessment Library for Schools is the simple, annual price. Your district’s cost is based on the most recent number of IEPs reported to the Office of Special Education and Rehabilitative Services. Districts with 400 IEPs or less pay a flat price based on that number and larger districts pay a price based on the reported number of IEPs multiplied by a cost per IEP.

When you purchase the Digital Assessment Library for Schools you have the option of including DALS+ to expand your library. DALS+ pricing follows the same format with different price points. The grid below will help you determine your district’s pricing!

### 2021 District Pricing

<table>
<thead>
<tr>
<th>District IEP Count</th>
<th>Price for DALS</th>
<th>Price for DALS and DALS+</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-100 IEPs</td>
<td>$1,800</td>
<td>$2,075</td>
</tr>
<tr>
<td>101-250 IEPs</td>
<td>$3,900</td>
<td>$4,475</td>
</tr>
<tr>
<td>251-400 IEPs</td>
<td>$6,000</td>
<td>$6,900</td>
</tr>
<tr>
<td>More than 400 IEPs</td>
<td>$15.50 / IEP</td>
<td>$17.75 / IEP</td>
</tr>
</tbody>
</table>

“Check out” each step on your library card!

- Confirm number of IEPs reported annually to the Office of Special Education and Rehabilitative Services (OSERS) by the district.
- Request your quote for **fewer than 400 IEPs** or for **more than 400 IEPs**.
- Return PO and Start-Up Form to sales representative/turn in online form.
- Watch for your welcome email for account administrators, which includes account setup training.
- District users, view your welcome email and set up username and password (for each user).
- Watch platform training videos.
If ever there was a time for unlimited digital administration — THIS is it!

Extraordinary times call for extraordinary solutions. The Digital Assessment Library provides many key benefits schools are looking for right now.

Easy cleaning
• Hardware devices can be easily sanitized
• Fewer items to clean after sessions

Social distancing for face-to-face assessments
• Q-global digital stimulus books can be shared on a second monitor placed a safe distance away from the examiner and used for test administration
• iPad devices using Q-interactive can easily connect at a safe social distance and through personal protective accommodations like plexiglass barriers

Remote administration
• Many Q-global tests can be administered via remote administration using the examinee’s own device
• Digital stimulus books found on Q-global can be used during a telepractice assessment
• Q-interactive can be used, with some accommodations, during a telepractice assessment
