Extraordinary times call for extraordinary solutions. The Digital Assessment Library, a solution that offers school districts unlimited use of nearly 40 assessments on Q-interactive® and Q-global®, provides many key benefits schools are looking for right now. Three of these include easy cleaning of devices, social distancing for assessments, and remote administration.

Easy cleaning
- Hardware devices can be easily sanitized
- Fewer items to clean after sessions

Social distancing for face-to-face assessments
- Q-global® digital stimulus books can be shared on a second monitor placed a safe distance away from the examiner and used for test administration
- iPad® devices using Q-interactive® can easily connect at a safe social distance and through personal protective accommodations like plexiglass barriers

Remote administration
- Many Q-global tests can be administered via remote administration using the examinee’s own device
- Digital stimulus books found on Q-global can be used during a telepractice assessment
- Q-interactive can be used, with some accommodations, during a telepractice assessment
