

Pearson

Writing tools *for all parts of written expression*

There's no debate that writing is a crucial skill, and in many cases, the basis for a first impression. From a young age, students begin learning the fundamentals of writing, starting with the basics of handwriting as well as correct sentence structure, good vocabulary choices, and punctuation. However, being an effective writer—a GOOD writer—goes well beyond the mastery of these skills. It requires the ability to organize thoughts, feelings, beliefs, and facts into a format that gives words in print meaning.

We know that each student has a unique learning profile, and we're here to help you determine how our writing assessments and tools can help you guide students toward success. We have assembled a collection of products that can help identify strengths and weaknesses to encourage effective writing development across the lifespan!
