

Manual Download Update for ASSIST and GRADE/GMADE (Macintosh® OS X Operating Systems using Safari™)

1. Click on your software download.
2. The download will launch automatically.
3. Once complete, **close** your Downloads window and **exit** Safari.
4. You will now see a **Contents** folder on your Desktop.
5. While pressing down and holding the **Control** key, click the **Contents** folder. Once the **Option Box** opens, **release** the **Control** key.
6. In the dialog box, select **Copy Contents**.
7. Open your **Macintosh HD** and then open the **Applications** folder.
8. Open the appropriate program folder, while pressing down and holding the **Control** key, click the shortcut to launch your program.
9. In the dialog box, select **Show Package Contents**. **Click** and **Drag** the existing **Contents** folder to the **Trash**. Your window should now be empty.
10. In the empty window, while pressing down and holding the **Control** key, **click** to access the dialog box and select **Paste Item**.
11. Once complete, close the windows and return to your Desktop.
12. You will now be able to launch your software. The new download will update your database tables and allow you to log in.
