The MMPI-3 provides an empirically validated, psychometrically up-to-date dimensional approach to assessment of personality and psychopathology.

**Scales**
- 5 new scales
  - Combined Response Inconsistency
  - Eating Concerns
  - Compulsivity
  - Impulsivity
  - Self-Importance
- 52 total scales
  - 10 Validity Scales
  - 3 Higher-Order (H-O) Scales
  - 8 Restructured Clinical (RC) Scales
  - 26 Specific Problems (SP) Scales
  - 5 Personality Psychopathology
  - Five (PSY-5) Scales

**Validity & Reliability**
- 37,968 validity coefficients across a variety of settings*
- 38,850 comparisons of MMPI-2-RF/MMPI-3 correlates**

**Reliability estimates and standard errors of measurement provided for**
- 1,620 participants in the normative sample
- 275 individuals in the normative test-retest sample
- 791 clients in an outpatient mental health sample

Ethnic Origins of Participants in the MMPI-3 Normative Sample Compared to 2020 Projected Census Data and MMPI-2/MMPI-2-RF Normative Sample

Mixed Race
Other
White
Hispanic
Black
Asian

Age Distribution of Participants in the MMPI-3 Normative Sample Compared to 2020 Projected Census Data and MMPI-2/MMPI-2-RF Normative Sample

80+
60-79
30-59
18-29

Education of Participants in the MMPI-3 Normative Sample Compared to 2020 Projected Census Data and MMPI-2/MMPI-2-RF Normative Sample

Bachelor's Degree or Higher
Some College
High School or GED
No High School or GED
