NNAT®2 (Naglieri Nonverbal Ability Test®–Second Edition) uses progressive matrices to allow for a culturally neutral evaluation of students’ nonverbal reasoning and general problem-solving ability, regardless of the individual student’s primary language, education, culture, or socioeconomic background.

Based on seven levels, for grades K through 12, the NNAT2 fosters a normative understanding of general ability without reliance on language, culture, or institutionalized curriculum.

Redesigned to engage and better assess the general student population.

The innovation of online testing, scoring, and reporting.

Online assessments allow for automated capture, real-time scoring and reporting, real-time normative analysis, and no physical commitment on the part of school administrators and instructors to store, distribute, organize, and ship thousands of booklets. Online items are presented one item per screen, facilitating students’ focus on the task. The online testing format calls for minimal computer-system requirements and provides online system-check tools, computer readiness downloads, and a total assessment solution that eliminates previous inhibitors throughout the assessment process, providing a value-added benefit to test administrators and support staff.

Taking only 30 minutes to administer, NNAT2 is specifically developed for use by a variety of education professionals, including but not limited to bilingual educators, testing coordinators, gifted and talented teachers, special education teachers, functional life skills facilitators, counselors, and school psychologists.

To order call 800-211-8378, or for more information request the NNAT2 Product Overview #999-8980-01-1 or contact your local Measurement Consultant.
