Emotional lability	<ul style="list-style-type: none"> <li>• Memory</li> <li>• Executive Functioning</li> </ul>	BASC-3 SCL-90-R

## Product Details

### **BASC-3**

A comprehensive set of rating scales and forms, BASC-3 helps you understand the behaviors and emotions of children and adolescents.

### **BCSE**

Brief Cognitive Status Exam helps evaluate global cognitive functioning in patients.

### **BDI-II**

The Beck Depression Inventory®-II is a brief, self-report inventory designed to measure the severity of depression symptomatology.

### **Brown EF/A Scales**

Brown Executive Function/Attention Scales measures *DSM-5* symptoms of ADHD along with less apparent impairments of executive functioning.

### **BYI-2**

The Beck Youth Inventories,™ Second Edition uses five self-report inventories to assess symptoms of depression, anxiety, anger, disruptive behavior, and self-concept in children and adolescents.

### **D-KEFS**

The Delis-Kaplan Executive Function System™ is the first nationally standardized set of tests to evaluate higher level cognitive functions in both children and adults.

### **D-REF**

Delis-Rating of Executive Functions lets you quickly and easily administer, score, and report the frequency of observed behaviors that identify executive function problems in children and adolescents.

### **RBANS Update**

The Repeatable Battery for the Assessment of Neuropsychological Status Update® is a brief, individually administered battery to measure cognitive decline or improvement.

### **RehaCom**

RehaCom® provides 28+ therapy modules for the treatment of cognitive deficits in Attention, Memory, Executive Functions, and Visual Field, as well as nine screening modules across these domains.

### **SCL-90-R**

The Symptom Checklist-90-Revised instrument helps evaluate a broad range of psychological problems and symptoms of psychopathology.

### **TEA-Ch2**

Test of Everyday Attention for Children, Second Edition uniquely measures separable aspects of attention.

### **WAIS-IV**

Wechsler Adult Intelligence Scale,® Fourth Edition is the most advanced adult measure of cognitive ability.

### **WISC-V**

Wechsler Intelligence Scale for Children,® Fifth Edition is an intelligence test that measures a child's intellectual ability, plus five cognitive domains that impact performance.
