

Convenient & Versatile

An easy-to-use non-verbal assessment of ability

RAVEN'S2 measures high-level observation skills, ability to reason, and intellectual capacity, even in people with communication disorders or English Language Learners (ELL). This test is designed to differentiate between people across a wide range of intellectual ability with more difficult items that fall within the top 20% of the population, but offers matrix patterns that are applicable at any ability level.

Content & Administration

The globally regarded RAVEN'S®2 Progressive Matrices assessment has undergone some major improvements including a new digital option! You now have the choice between traditional paper or digital administration through Q-global. RAVEN'S2 is delivered on a familiar technology designed to put examinees at ease while reducing inventory concerns and test kit transport. The new administration items can be used in a variety of settings, in culturally diverse populations, and/or with non-verbal children as young as four or older adults as old as 85. Once the assessment is complete, the administrator receives a raw score as well as a percentile rank based on norms collected from the general population.

It can be administered fairly to virtually everyone, including those who are not language proficient or have communication-related disabilities. When administered under timed conditions, RAVEN'S2 can also be used to assess intellectual reasoning, and the non-verbal aspect of the test minimizes the impact of cultural or language bias.
