

BASC-4 BESS + Review360®

Screen, monitor, and support student wellbeing

Built on the trusted **BASC™-3 BESS** foundation, **BASC™-4 BESS** helps schools and behavioral health teams screen for behavioral and emotional risk, identify students who may need additional support, and bring those insights into **Review360®** to guide MTSS decisions, intervention planning, and progress monitoring.

The **BASC-4 BESS** on **Review360®** consists of **three brief forms** that range from 21 to 30 items and can be completed by **teachers**, **parents**, or **students**.

How it works with Review360®

After screening, Review360® helps teams organize BASC-4 BESS results alongside other student information, connect students to targeted supports, and monitor progress over time.

1. **Administer BASC-4 BESS, review behavioral and social-emotional screening data in Review360®.**
2. **View behavioral, academic, and attendance insights together and discuss student needs with the team.**
3. **Connect screening results to targeted Tier 1–3 interventions and strategies.**
4. **Use Review360® to monitor progress and adjust support as student needs change.**

Technical information

Administration time:
5 minutes individual,
15 minutes group

Administration:
Paper; Digitally via Review360®

Languages:
English and Spanish
(Parent, Teacher, and Student Child/Adolescent Forms)

BASC-4 BESS and BASC™ SWSS work together in Review360® to help schools move from identification to action.

BASC-4 BESS	BASC SWSS
Identifies students who may be experiencing behavioral or emotional risk.	Pinpoints the social wellness skills students need to strengthen.

Within Review360®, educators can review screening results, connect students to targeted supports and skill-building resources, and monitor progress through the integrated MTSS.

Early insights mean early action

A systematic, universal screening process helps professionals make more informed decisions about who may need additional support. When BASC-4 BESS data is used in Review360®, teams can use their time and resources more effectively by connecting screening results to intervention planning and progress monitoring.
