Review360 for SLPs—
Customizing Speech-Language IEP Goals with Review360®

The Intervention and Progress Monitoring Tool for SLPs module, delivered through the Review360® platform, includes a menu of long-term/annual goals that are tied to the Common Core State Standards. Each goal contains the required elements for a standards-aligned goal/objective:

EXAMPLES:

Timeline/Duration	By the end of 36 weeks
Condition of Performance	Use age-/grade-level oral language
Observable Behavior	Including grammatically correct sentences containing prepositional phrases
Level of Performance	With 70% accuracy

Timeline/Duration	By the end of 36 weeks
Condition of Performance	Produce /r, ɚ, ɝ/
Observable Behavior	In connected speech
Level of Performance	With 75% accuracy

Long-term/annual goals are listed for many of the most common targets for speech sound production, voice, fluency, and language skills in this module. You can use these goals as they appear in the module or customize them to reflect the individualized plan for the student.

EXAMPLE:

REQUIRED ELEMENT	CURRENT GOAL	CHANGES TO...
Timeline/Duration	By the end of 36 weeks	By the end of 18 weeks
Condition of Performance	Produce /r, ɚ, ɝ/	Produce / ɚ/
Observable Behavior	In connected speech	At the phrase level
Level of Performance	With 75% accuracy	With 80% accuracy

Pearson

When creating short-term objectives (i.e., interim targets, benchmarks), you can modify one or more of the four required elements of the standards-aligned annual goal to meet individual student needs.

EXAMPLE:

Long-Term/Annual Goal: By the end of 36 weeks, the student will produce /r, ɚ, ɝ/ in connected speech with 75% accuracy.

Short-Term Objective #1	By the end of 7 weeks, the student will produce /r, ɚ, ɝ/ at the syllable level with 60% accuracy.
Short-Term Objective #2	By the end of 18 weeks, the student will produce /r, ɚ, ɝ/ at the two-syllable word level with 65% accuracy.
Short-Term Objective #3	By the end of 27 weeks, the student will produce /r, ɚ, ɝ/ in multisyllable words and phrases with 70% accuracy.
Short-Term Objective #4	By the end of 36 weeks, the student will produce /r, ɚ, ɝ/ in connected speech with 75% accuracy.

Once your goals are included for each child, evidence-based interventions and progress monitoring is as easy as capturing your data and printing a detailed report!
