

Clinical Assessment Class Packs

Frequently Asked Questions

What are the Clinical Assessment Class Packs?

For a limited time, Pearson is offering complimentary Clinical Assessment Class Packs which provide you and your students with digital access to our most popular mental health assessments. As part of our [Training Partnership Program](#) (TPP), our Clinical Assessment Class Packs help you prepare new clinicians to use the most relevant, research-based tests for screening and diagnostic assessment.

Under your supervision, your students will have immediate and convenient access to technical aspects of the tests via digital manuals and user's guides. In addition, they can administer, score, and produce comprehensive reports using the [Q-global](#)® platform to further enrich their understanding of these valuable clinical tools.

Note: These Class Packs are available for digital administration and scoring only. If you would like to use paper materials to teach these assessments, as a TPP member, you qualify for the standard 40% discount on eligible materials.

What tests are included the Clinical Assessment Class Packs?

The following Clinical Assessment Class Packs are available:

Adult Class Pack

For each student, the Class Pack for adult assessment includes two report usages and test documentation (e.g., digital manuals and user's guides) for each of the following assessments:

Test Name	Profile/Score Reports	Interpretive Reports	Progress Reports	Test Manual	Report User's Guide
Wechsler Individual Achievement Test® (WIAT®-4)	X			X	
Millon® Clinical Multiaxial Inventory-IV (MCMI®-IV)	X	X			
Minnesota Multiphasic Personality Inventory®-3 (MMPI®-3)	X	X		X	X
Millon® Behavioral Medicine Diagnostic (MBMD®)	X	X		X	
Beck Depression Inventory®-II (BDI®-II)		X	X	X	
Beck Anxiety Inventory® (BAI®)		X	X	X	
Beck Hopelessness Scale® (BHS®)		X	X	X	
Beck Scale for Suicide Ideation® (BSS®)		X	X	X	
Symptom Checklist-90-Revised (SCL-90-R®)	X		X	X	
Brief Symptom Inventory (BSI®)	X		X	X	
Brief Symptom Inventory 18 (BSI® 18)	X		X	X	
Quality of Life Inventory (QOLI®)	X		X	X	

How do I assign these Class Packs to my students on Q-global?

Follow these steps to assign the Class Pack materials to your students on Q-global:

1. For each student in your class, first create a new user in one of two ways:
 - a. Add as a user to an existing account (Manage Accounts > Select Account > Users > New User)
 - b. Create a subaccount (Manage Accounts > New Account). Data in Q-global is saved at the account level. If you want a layer of privacy between users/class/etc., consider creating subaccounts for each student, or for each class.
2. Allocate the Class Pack materials to each student user. The materials will be available in Q-global in the form of two types of inventory:
 - a. Assets that consist of digital manuals and user guides. These assets are located in your Q-global Resource Library and must be allocated to each student. For step-by-step instructions on how to allocate the assets, view a brief tutorial [here](#).
 - b. Usages that allow a user to score and generate reports for a completed test. Usages do not need to be allocated before use, but we recommend that you allocate two usages of each test to each student user. For step-by-step instructions on how to allocate the usages, view a brief tutorial [here](#).

How does Pearson follow Data Privacy and Confidentiality Rules?

Pearson's primary concern is protecting examiners, their data, and their privacy. All incoming data in Q-global is de-identified using the HIPAA Safe Harbor standard. The Safe Harbor standard requires that 18 variables be eliminated from any incoming data. These variables include names; geographic subdivision less than the state level (street address, city, county, zip, etc.); all elements of dates and any age category over 89; telephone numbers; fax numbers; email addresses; social security numbers; medical record numbers; health plan beneficiary numbers; account numbers; certificate and license numbers; vehicle identifiers (VIN, serial numbers, license plate numbers, etc.); device identifiers and serial numbers; URLs; IP addresses; biometric identifiers (fingerprints, iris scans, voice-prints, DNA samples, etc.); full facial photographic images and any other comparable images; and any other unique identifying number, characteristic, or code, unless otherwise permitted by the Privacy Rule for re-identification. For additional details we highly recommend reading the [Q-global Terms and Conditions](#) and the [Q-global Privacy Policy](#).
