

TRANSCEND

The interim assessment that starts with the student instead of the standard

Transcend is an interim assessment system designed to empower learning. Integrated, aligned, and personalized Transcend only tests students on content they have already learned and responds to how they learn, uncovering powerful insights to keep progress moving forward.

Transcend™ provides:

- **A flexible design** that can be easily adjusted to meet learners where they are in their learning journey
- **An item bank aligned to your scope and sequence**, ensuring the assessment is in lockstep with your students' instruction
- **A computer-adaptive model** that reduces testing time leaving teachers more time for instruction
- **Dynamic score reports** that provide educators timely information about student achievement

 Meet Transcend, a flexible interim assessment that allows you to quickly obtain the student achievement information you need—when you need it.

Fully aligned to your state's standards and your district's unique scope and sequence, Transcend will only display questions based on the material your students have had the opportunity to learn.

Transcend's ability to provide scope and sequence flexibility ensures your interims can be built to align with the changes to instruction and to what students have been taught.

Implementing a custom interim assessment is as easy as 1-2-3!

1. Interims are administered three times throughout the school year.
2. Select the domains and subdomains to be tested with each interim based on your district's scope and sequence.
3. Schedule your interims with the press of a button.

The benefits of Transcend are threefold

STUDENTS

are tested exclusively on content they've been taught. Tests take under an hour to complete, and ensure reliable, valid, and fair results.

TEACHERS

see the impact of what they've taught with immediate results, highly actionable data, and easy-to-read reports.

ADMINISTRATORS

understand the impact of instruction and can intervene when necessary, which is especially important given the unknown impact school closures have had on teaching and learning.

This visionary new assessment system allows you to build and deploy fully customized tests—often in under a minute—directly from your local scope and sequence.

Transcend is flexible, aligned, customized and integrated.

As districts everywhere are flexing their curriculum scope and sequence to accommodate the unique new challenges, measurements tools used in the past may not align to instruction this year.

Conventional assessments test students on the same content multiple times during the year, but Transcend's *flexibility allows you to customize the test, measuring only the material your students have been taught*. Additionally, previously taught standards are continually integrated into each assessment to make sure students really understand the concepts.

Transcend Assessment Design

Assess fall content only

Assess winter content + fall review

Assess spring content + winter & fall review

Conventional Assessment Design

Fall interim test

Winter interim test

Spring interim test

Get the reporting you need when and how you need it.

Transcend goes beyond simply measuring to help inform instruction!

Educators looking to measure student performance should expect three key components from their assessment's reporting abilities.

Look for reporting that is:

1. Informative and actionable so you can implement the assessment data with other student information to help improve instruction
2. Timely so you can quickly provide student feedback and "course correct" while the content is still fresh
3. Aligned to scope and sequence so student performance accurately represents what students know and are able to do

Transcend's dynamic reports are available immediately after the assessments are administered, provide reliable feedback about your students' achievement, and can be sorted by district, school, classroom, and student.
